NRG

Have you ever wished you could combine the look of traditional timber windows and doors with the durability and security of a modern PVCu product?

We'll wish no longer – with the Platinum NRG FlushSASH you can.

ROLLER LOCKS

Bi-directional roller locks and their corresponding keeps and shootbolts as standard.

HANDLE

A choice of stylish handles in a variety of colours can be specified. All handles (not monkey tail) are lockable by key.

SIDE HUNG HINGE

Side hung windows use the Cotswold friction stay - a high quality hinge that allows the entire sash to slide sideways when opened to facilitate the cleaning of the outside of the sash from inside.

MONKEY TAIL

Monkey tail handles and casement stays for that authentic look.

SHOOTBOLTS

Each sash incorporates shootbolts at each end for increased security.

ROLLER LOCK

Bi-directional roller locks slide outwards to locate into their respective keeps.

Low-line glazing bead with low-profile gaskets for improved security and greater sightlines.

Eco-friendly PVCu profile uses calcium-based stabilisers rather than lead that most manufacturers use.

Note: Some of the options shown are for top hung windows.

In our ongoing quest to provide the highest quality products for our customers, our designs and specifications are subject to change without notice.
